## (5) IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of:

LAYZELL, D.B., et al.

Serial Number:

10/040,469

Filing Date:

January 9, 2002

Title:

Methods for Enhancing Plant Growth Using Hydrogen Gas

Allowed:

September 8, 2004

Confirmation No.:

2590

Art Unit:

3643

Examiner:

Gellner, J.L.

Agent Ref. No.

1998-016-08US

Assistant Commissioner for Patents Washington, D.C. 20231

Dear Sir,

## COMMENTS ON STATEMENT OF REASONS FOR ALLOWANCE

The above-captioned patent application was allowed on September 8, 2004. In the Detailed Action accompanying the Notice of Allowability, the Examiner stated that the phrase "for a duration sufficient to increase H<sub>2</sub> uptake of the soil", which is recited in allowed claims 1 and 19, was considered to mean at least one week. Applicants respectfully disagree with this statement, as a duration of one week is merely an example given in the description. It is clear from reading the specification that duration of H<sub>2</sub> treatment of soil may vary, so long as the duration results in an increase in H<sub>2</sub> uptake of the soil.

The Issue Fee Transmittal is being forwarded simultaneously herewith. Please deduct any additional fee(s) which may be required from our deposit account No. 17-0110.

Respectfully submitted,

Stephen J. Scribner
